Ship's today must have the finest equipment if they are to compete successfully for the World's trade—in spite of all the latest developments in navigational aids, the ordinary

compasses

which for years have helped the navigator to make safe and speedy landfalls, have gradually been brought to a state of perfection in keeping with the demands made upon them due to the new methods of ship construction. When you choose a Unit Compass

made by

us you get one of the finest type of magnetic compasses made today. The Unit Suspension, first designed in the days of the early Steamship, but now effectively cushioning the bowl against all the vibrations and shocks of a modern high speed vessel is the best ever. The rest of the binnacle is made up to the same high standards. In fact, if you want good service when making a choice for navigational equipment it is worth considering

CATALOGUE OF ADMIRALTY CHARTS AND OTHER HYDROGRAPHIC PUBLICATIONS

SECTION 1.—GENERAL INFORMATION.

The Catalogue of Admiralty Charts and other Hydrographic Publications is published annually and comprises the 17 sections as shown on the contents page, and is sold at 6*s.* 6*d.* per copy. The date to which this edition is corrected is shown on the title page. Subsequent admendments should be made from the information regarding the publication or withdrawal of Admiralty charts and navigational publications promulgated in Admiralty Notices to Mariners.

2. **Arrangement of charts and diagrams in Sections II–XII.** Information as described below is given in tabular form in seven columns, the charts or diagrams being arranged in numerical order under the geographical or class heading. The geographical arrangement of Sections IV–X commences with the British Islands and proceeds around the World in an easterly direction, so far as the configuration of the land permits. These sections, for the sake of a more ready means of reference, are arranged in sub-sections corresponding to the relevant index sheet enumerated under the geographical heading. Polar charts are listed in Sections XI and XII:—

Col. 1.—Chart or Diagram No.

The serial number of a chart or diagram is printed in the bottom right-hand corner, and in many cases also in the top left-hand corner.

Col. 2.—Title of Chart or Diagram.

The main title is usually shown and where there are alternative or secondary names they are shown in brackets. So far as possible, plan titles are shown in the order they appear in Admiralty Sailing Directions. In certain cases where two or more plans of different scales are shown on the chart, the natural scale of each plan is shown in brackets following the plan title (see Col. 3).

Col. 3.—Natural Scale:

The natural scale of a chart or plan is given in a form quoting the first three significant figures. The following table gives the relationship between natural scales and the length of a mile (a minute of latitude), or of a degree of latitude in the case of smaller scales:—

Table of Natural Scales expressed in Inches to the Mile of Degree of Mid-Latitude (at 45°).

Minute of Latitude						Degree of Latitude	
Natural Scale 1:	Inches	Natural Scale 1:	Inches	Natural Scale 1:	Inches	Natural Scale 1:	Inches

12,000	6·07	50,000	1·46	350,000	·21	20,000,000	·22
14,000	5·21	60,000	1·22	400,000	·18	30,000,000	·15
16,000	4·55	70,000	1·04	500,000	·15	40,000,000	·11
18,000	4·05	80,000	·91	—	—	50,000,000	·09

NOTE.—For charts drawn on the gnomonic projection which cover considerable areas, e.g. ocean charts Nos. 5095, 5096, &c., the scales given are those at the respective Points of Tangency of the projections. It should be observed that the scale varies considerably throughout such charts.

Col. 4.—Date of Publication (month and year).

The date of publication of a chart or diagram is shown below the bottom margin in the centre.

Col. 5.—Date of New Edition or Large Correction (month and year).

The date of the latest New Edition or Large Correction is shown on a chart below the bottom margin to the right of the publication date.

Col. 6.—Size in inches.

Excepting charts contained in Atlases and certain diagrams, the size relates to the area of the work within the inner lines of the graduation or border, the dimensions being given to the nearest inch. In some cases part of the chart is on a slip plate joined to the main sheet, and this is indicated by an " S " placed against the figures.

Col. 7.—Price.

This column is left blank for the insertion of prices, if desired, now given in a separate price list. Chart Agents and Chart Depots abroad are authorised to make agreed percentage additions to prices to cover local charges, &c.

3. **Chart labels.**—A small label showing the serial number, title and price of the chart, and providing spaces for the folio number and consecutive number of the chart in the folio, is pasted on the back of certain charts. On other charts the information is printed on the back.

4. **Numerical List.**—A numerical list is given in Section XVI arranged in tabular form in three columns. Col. 1—Chart or diagram No.; Col. 2—No. of the page on which the details of the chart will be found. Col. 3 is left blank for prices which are now given in a separate price list.

5. **Chart folios.**—A special series of chart folios, containing selections of charts for use in merchant ships, has been constituted. A list of these folios together with the approximate number of charts in each folio and the price, are given in Section XIII. These may be obtained through any Chart Agent in the United Kingdom.

6. **Admiralty Sailing Directions (Pilots) and other Hydrographic Publications** offered for sale to the Public are contained in Section XIV, and an index sheet No. 5600 showing the areas covered by the Sailing Directions is included in Section XVII. The publications are listed under the headings shown on the contents page and are arranged in numerical order according to N.P. Item Nos. together with titles and prices.

7. **Purchase of Charts and Publications.**—Charts and Publications listed in this catalogue may be obtained from the **Admiralty Chart Agents and Depots** listed in Section XV, page 70. Amendments to the list are published in Admiralty Notices to Mariners.

8. **Index Chartlets** are listed on page 2. A set of index sheets comprising Nos. 5501–5600 is bound in Section XVII at the end of this catalogue. Index No. 5501—The World—besides showing the limits of the general charts of the World, shows the limits of Indexes which give greater detail of the areas they cover. Where indexes overlap full details of charts are not shown on each index. The areas where chart details are not fully shown are indicated by the omission of the land tint and a reference to the appropriate index. Index chartlets printed singly on chart paper are sold separately at 6*d.* per copy.

9. **Admiralty Notices to Mariners.**—Available for issue gratis to merchant ships are published in three editions, as follows:—

(*a*) Weekly Complete Edition for general service, and (*b*) Weekly Home Edition for Home area service. These are obtainable from Chart Agents, Mercantile Marine Offices, H.M. Customs Offices, British Consular Offices, and other sources as shown in Admiralty Notice to Mariners No. 14, published annually.

(*c*) Quarterly Edition for foreign-going merchant ships. This edition is a collation of notices, relating only to Charts and Sailing Directions, published during the quarter. These may be obtained from Mercantile Marine Offices in the United Kingdom, and may also be inspected at Commonwealth Government Shipping Offices and at British Consulates.

10. **Foreign Notices to Mariners** may be inspected at any of the offices listed in Admiralty Notice to Mariners No. 14.

11. **Nemedri Route-Books** issued by the International Routeing and Reporting Authority, Admiralty, are obtainable gratis from the Authorities indicated in Admiralty Notice to Mariners No. 14. Corrections to Nemedri are promulgated in Section IV of Admiralty Notices to Mariners.

12. **Servicing of Merchant Ships' Chart Outfits.** Certain Chart Agents provide facilities for the periodical servicing of chart outfits. Fees are charged at fixed scales per hundred for examination and correction by hand where possible, unserviceable and out-of-date charts are replaced as necessary at usual prices. Charges depend upon the length of time since the outfit was previously serviced. Enquiries should be made of the nearest Chart Agent.

13. **Information for the Correction of Admiralty Charts and Hydrographic Publications.** Attention is invited to the notice on the cover and title page of this catalogue.

14. **Errors and Inaccuracies** noticed in this catalogue should be reported to the Hydrographer, Admiralty Hydrographic Supplies Establishment, Taunton, Somerset.

15. **Advertisements.** Correspondence regarding advertisements or advertising space in this catalogue should be addressed to the Director of Publications, H.M. Stationery Office, Atlantic House, Holborn Viaduct, London, E.C.1.

* "Fully Navigational Decca Charts" are kept up to date from Admiralty Notices to Mariners and render unnecessary the additional use of the corresponding navigational charts.

The Number given to the Decca chart is the same as that of the basic chart from which it is prepared. The chart is prefixed by "L", meaning latticed, followed by bracket containing D, meaning Decca, and the number of the chain, e.g., L(D7)3761 means chart 3761 latticed for Chain 7. L(D9)3761 applies to the same basic chart latticed for Chain 9. When ordering Decca charts, the complete numbers should always be quoted.

All new navigation charts, new editions and large corrections printed since 18th June 1958 which have one or more Decca latticed editions will bear the letter "L" in the bottom right-hand corner, just inside the outer border.

* "Fully Navigational Decca Charts" are kept up to date from Admiralty Notices to Mariners and render unnecessary the additional use of the corresponding navigational charts.

The number given to the Decca chart is the same as that of the basic chart from which it is prepared. The chart is prefixed by "L", meaning latticed, followed by bracket containing D, meaning Decca, and the number of the chain, e.g., L(D7)3761 means chart 3761 latticed for Chain 7. L(D9)3761 applies to the same basic chart latticed for Chain 9. When ordering Decca charts, the complete numbers should always be quoted.

All new navigation charts, new editions and large corrections printed since 18th June 1958 which have one or more Decca latticed editions will bear the letter "L" in the bottom right-hand corner, just inside the outer border.

The new Kelvin Hughes Chart Department, where some 50,000 charts are filed and kept up to date

KEEPING 50,000 CHARTS UP TO DATE *at Saint Clare House**

Now housed in new premises at St. Clare House, Minories, London, E.C.3, the Kelvin Hughes Chart Correction Service has been re-organised for even greater efficiency. Here, continuous correction is made to a normal stock of 50,000 charts covering every port and trade route in the world. Single charts or world outfits to special folio requirements can be supplied from stock at short notice. The service covers collection of chart outfits at regular intervals and their return to the ship fully corrected and up to date.

*** The new premises of Kelvin Hughes include a well-equipped showroom where the most modern types of marine radar, echo sounders and general navigational instruments are on display in working order.**
